

## Basic Lead Poisoning Information

Lead poisoning or lead toxicity refers to exposures to lead that result in illness and require immediate medical attention. It is used to describe cases when there are severe health effects related to high blood lead levels.

**YOU'RE INVITED!**

## PUBLIC HEALTH ROUNDTABLE - LEAD

Join Siouxland District Health Department Environmental staff along with Iowa Poison Control Center staff for this informative roundtable discussion on Lead prevention.

Roundtable is geared towards nurses, physicians and other medical staff who work with pediatric and adolescent patients. We need your help to address the climbing number of elevated blood lead levels in Siouxland.

Topics for discussion will include:

- Blood Level Testing Protocols
- Blood Level Treatment Protocols
- Chelation Cases and information
- Educational resources

For any questions regarding roundtable please contact [mlewis@siouxlanddistricthealth.org](mailto:mlewis@siouxlanddistricthealth.org)
